

# GRR-RIP BLOCK - The Smart Choice for Safety

Harness the ultimate gripping power of the only pushblock with “smart” Gravity Heel hooks that know where to grab your workpiece. The GRR-RIP BLOCKS’s drop-down heel hooks are there when you need them and instantly retract when you don’t. Safety’s never been so smart.

Reversible GRR-RIP BLOCK’s ergonomic handle is angled for comfort and precise directional pressure, ensuring a stable feed. Work Safer, Work Smarter...

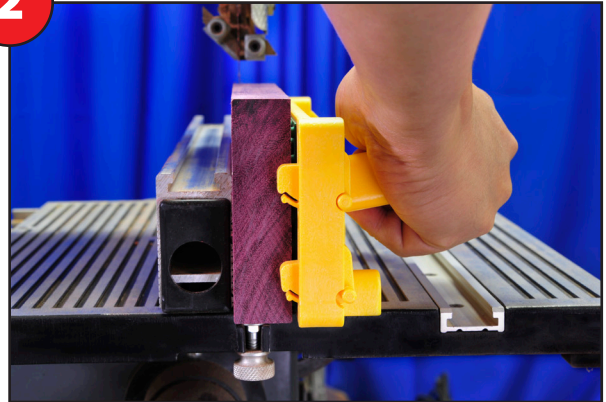

1

## Extreme Grip

GRR-RIP BLOCK’s cutting edge technology increases safety and stability when working with jointers, band saws, router tables, shapers and table saws.

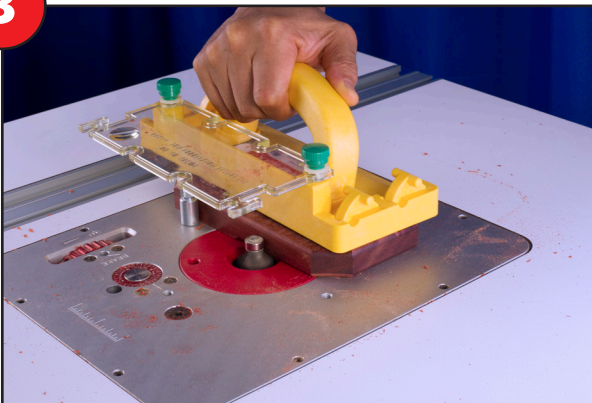

2

## Versatility

GRR-RIP BLOCK’s built in flip guide gives you options. Use the 90 degree flip guide for veneers or resawing on band saws. Or use the GRR-RIP BLOCK against the router fence for beaded face frames and other special profiles.

3

## Protection

Wield improved control over your workpiece for free hand routing while keeping your hands clear and safe. Gravity Heel hooks lock in place, keeping them away from the router bit. (GRR-RIP BLOCK shown here with optional deflector / connector which is sold separately).

GRR-RIP BLOCK’s revolutionary Gravity Heels work with you, hooking the tail end of the stock to give you complete control and confidence. When you don’t need them, the heel hooks automatically retract or you can lock them out of the way.

The Podular Green GRR-RIP non-slip material gives you command over your work
