Wet Filter Installation Instructions

Step 1.

Remove the Motor assembly from the top of the vac. Next, lift out the dry cloth filter from the vac base.

Step 2.

Loosen the plastic knob on the bottom of the cartridge filter and slide the cartridge filter off of the motor intake assembly.

Step 3.

Slide the Foam "wet" filter onto the vac intake as shown here. Make sure the filter covers the entire intake assembly.

Step 4.

Place the motor unit back onto the vac and you are ready to use the Summit Vac for cleaning up wet or damp debris.
