Basic Pro-Grip™ Clamp Maintenance

These Instructions are for basic maintenance and cleaning of your PRO-GRIP™ Straight Edge Clamps.

Parts

- 1. Clamp Body
- 2. Clamp Lever
- 3. Lever Pin
- 4. Fixed Clamp Head
- 5. Steel Clamp Rod
- 6. Adj. Clamp Head
- 7. Steel Clips
- 8. Bow-tie Assembly
- 9. Tension Spring
- 10.Spring Lock Pin
- 11.End Cap
- 12.Scale

Step 1

Make sure handle is in the upright and unlocked position.

Step 2

While firmly holding clamp, push the end cap out, up and off the clamp body.

Note: end cap is under spring tension.

Step 3

Slide the entire clamping assembly and steel clamp rod from the clamp body.

Step 4

Clean the clamp with a soft cloth and warm soapy water. (Remove any build up of sawdust and glue)

Step 5

Slide the entire clamping assembly and steel clamp rod back onto the clamp body.

Step 6

Make sure handle is in the upright and unlocked position.

Step 7

Slide the spring to the end of the clamping rod against the pin.
Place the cut out end of the end cap onto rod behind spring.

Step 8

While firmly holding clamp, push the end cap out, down and snap the end cap back into place.

Note: end cap is under spring tension
